

Sources and References

Evidence trail for every number in the Tour-e submission

Source · data used · date · link

How to read this list

Every externally sourced number in the two slides and the supporting files is listed below with the data used, the publication date and a clickable link. Figures that are our own (the 2035 market extrapolation, the cost stack, the 2035 battery price, the BaaS model and all Tour-e specifications) are marked as team estimates or design targets wherever they appear, and their working is in 02_TCO_Model.xlsx.

Market size and segments
